

Interorient Shipmanagement has worked with the Nivyash Marine Team since beginning of 2022 and they have conducted VDR remote navigational audits/assessments for over 25 vessels. This has helped us verify safety of navigation, ensure effective and consistent application of navigational practices and bridge procedures in accordance with Interorient Shipmanagement procedures, regulatory and industry requirements.

Nivyash has a team of trained auditors that provide us with an objective independent check from a third-party perspective. They are supportive and with them we are able to align KPIs for internal and external benchmarking of navigation audits.

Below are key factors where we have worked together to obtain operational excellence:

Safety: A thorough VDR assessment identified potential risks, vulnerabilities, or technical issues that could compromise the safe operation of our vessels.

Efficiency: The audit evaluated the effectiveness and performance of our systems, identifying areas where improvements can be made to enhance operational efficiency.

Regulatory Compliance: The Nivyash Marine Team helped us to ensure compliance with relevant regulations, guidelines and industry best practices. They verified that our navigation procedures in place meet the required standards and are aligned with regulatory requirements.

Training and Competency: The Nivyash Marine Team independent assessment evaluated the training programs and competency levels of the crew members and helped as to identify any training gaps or areas where additional training is needed to ensure proper system utilization and emergency response capabilities.

Continuous Improvement: Finally, the VDR audits performed by them provided us an opportunity to identify areas of improvement in associated processes, allowing the implementation of corrective actions and enhancements to continually optimize the system's performance and effectiveness.

In summary, Capt Yatendra and his team members were very approachable during all this time. Their knowledge and passion to achieve the best for their clients is highly appreciated.

Best Regards
Ashley
